The telephone people held that they are now operating more than 1500 phones, and that under the conditions of their franchise, they have the right to advance uniformly on all phones 25 cents each. The city held that the telephone company has not the number of phones, as contemplated by the ordinance, to warrant the increase. This contention assumed form of injunction proceedings and Judge Browning having certified his disqualification, Judge Greever was engaged for the hearing and granted the restraining order, as indicated. The order granted by Judge Greever temporarily provided same shall accrue to the benefit of the telephone company, but shall be held as a trust fund during such pendency, as indicated by the clerk of the Forty-seventh Judicial district. by the collectors for the telephone people, from month to month until

final settlement shall be made, The appellate court of which B. M. Baker was chief justice, in ending Its decision uses the following language:

We find that there were not 1500 telephones in operation in the city of Amarillo at the time appellee charges appellant with intending to increase rates for service This being true, we hold that appellant was not autherized to increase rates for service and therefore the action of the district Judge in granting the writ of injunction was proper and his order ought to be sustained, and we accordingly direct the proper judgment to that effect. It is not necessary that this court should express any view concerning the telephones in the Amarillo Hotel and the other telephones mentioned in the petition for injunction.

"Nor do we pass upon the right of action, nor upon the validity of the two city ordinances, which upon their acceptance by the telephone company appear to have ocnstituted a contract between the city and the company, New York, Dec 27.-The state based upon a sufficient considera-
